Connecting to DET wireless network on Windows 10

Click the **wifi symbol** on the right side of the taskbar.

Select **Network Settings**

In the list of available networks, click on **nswdet**. Then click the **Connect** button.
Enter your username and password for the DET portal. You need to put @detnsw after your username. Then click OK.

Click Continue to continue connecting.

You may be asked to enter in your credentials for the DET proxy, if this happens you will need to put in your username and password again. Do Not add @detnsw after your username this time. Click next to continue.

You are now connected to the DET network! Verify that you are connected by moving the mouse over the Wi-Fi symbol in the taskbar.
